
Canvas: Staple Gun. Use and load a Staple Gun.

EQUIPMENT: What you will need

Staple Gun

Staples

SAFETY: How to stay safe

Never point or fire a staple gun at anyone or anything except the canvas on a stretcher.

Make sure you keep the staple gun out of reach of children.

Loading and using a staple gun

Check the staples

Check the slide of staple gun for staples.

- Open the sliding base of the staple gun.

Load staples into the slide

Put more staples in if needed.

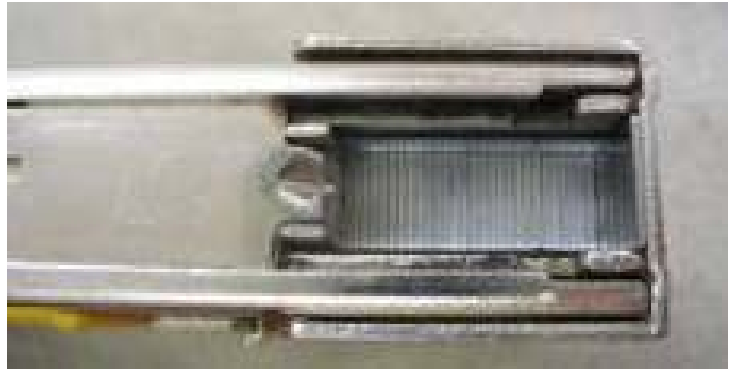

Load them the right way up

Make sure the staples have the points facing out.

Close cover

Slide the cover back over the staples.

Close cover

Close the cover completely.

TIPS: Staple Gun

Keep your staple gun away from children and people who do not know how to use it.

You can buy short staples which will not drive into the stretcher too far or too hard. These ones are easy to get out if you need to take paintings off the stretcher after they are finished.

- You can get the same effect from regular staples by tilting the gun a little above the stretcher bar when you are stapling the canvas on. This way the staples will still be sticking out from the wood a little.
